

Industrial Control Training System

Model # IC - 101

INNOTEK
INNOVATIVE TECHNICAL SOLUTIONS

The Industrial Control Training System provides students with hardware allowing for hands-on experiments in wiring and troubleshooting of control circuits. The system gives access to devices allowing students to connect all circuit components directly or via terminal blocks.

Basic System Includes:

- Lockable Disconnect
- Power Supply
- E-Stop
- 4-Pushbuttons
- 4-Indicator Lights
- 1- Starter
- 1- Reversing Starter
- 2- Relays
- 1- Limit Switch
- 1- Selector Switch
- Panduit System for Concealing of Wiring

Model Shown: IC-101-AC-T-1

Use the following information to determine the appropriate model number for your training needs.

Model Shown: IC-101-AB-M-2

Basic System Add-Ons Form Factor # of Sides

IC - 101 - A B C D - T or M - 1 or 2

A – Sensors Add-on
B – 3-Phase Motor and VFD Add-on
C – PLC Add-on
D – HMI Add-on

T – Table Top
M – Mobile Cart

1 – Single Sided
2 – Double Sided
